

## EasyPE using Information

**Following informations have to be read carefully and honored by using EasyPE also!**

In order to use EasyPE you have to be user of a validly licensed Microsoft Windows XP or Microsoft Windows Vista. Because EasyPE uses the Microsoft Windows AIK to create the Easy Rescue Tool System, each user of EasyPE has to have a Microsoft Windows AIK. Each user of a validly licensed Microsoft OS can download and use the Microsoft Windows AIK by himself free of charge. If EasyPE cannot find any installed Microsoft Windows AIK on the user's PC, EasyPE will download this program. With the purchase of an EasyPE package you don't get a Microsoft Windows AIK.

Using the Microsoft Windows AIK is on the respective users own authority. Each user of the Microsoft Windows AIK has to respect the license conditions of the Microsoft Windows AIK and also has to take charge of compliance these license conditions.

Each EasyPE user using EasyPE and the resulting Easy Rescue Tool System and it's content in what version status ever is independently and solely responsible to accept and follow the respective application manufacturer's/ supplier's license agreements.

Users of the EasyPE tool set download the respective applications or software themselves and under their responsibility from the respective supplier. EasyPE and it's producer and/or distributors are not providing any licenses of any user applications, programs or software at any time. The respective license conditions of the respective application providers can be found at the respective websites or as part of the respective download conditions.

**Exception:** The EasyPE software manufacturer/ author/ dealer is providing licenses for software only which specifically has been ordered and purchased by a user/buyer at such an EasyPE software manufacturer/ author/ dealer, or for software packages/ kits offered by an EasyPE software manufacturer/ author/ dealer which are supplied including a licensing fee already.

In that case whereby other licensed programs would be integrated into the Easy Rescue Tool System the user/ purchaser of these other licensed programs would be solely responsible for licensing this software.

To integrate any unlicensed software into the EasyPE Rescue tool system is illegal and explicitly prohibited!

The easy way to create an individual bootable Easy Rescue Tool CD or a bootable USB-Stick based on Microsoft Windows Vista PE

License terms of the respective downloaded programs can be read in the downloaded program packages or on the respective web sites.

For any breach of the respective license conditions and offense thereof caused by the respective EasyPE user the EasyPE software producer, EasyPE author and the EasyPE distributor are taking neither any legal responsibility nor any adhesion.

Windows is a registered trade mark of Microsoft Corporation. Linux is a registered trade mark by Linus Torvalds. Other mentioned trade names could be also registered trade marks by their respective owners. They should be considered and honored as such.

Technical changes, deviations of the illustrations and mistakes reserved. The EasyPE manufacturer, EasyPE author and the EasyPE distributor cannot be taken legal responsible nor can take any adhesion for incorrect data or data loss and/or any consequences hereof.

EasyPE is governed by the copyright laws of Germany as well as by international copyright laws. Any unlawful use such as duplication, processing, distribution or any form of commercialization of such material beyond the scope of the copyright law shall require the prior written consent of its software producer or author. Otherwise it will be prosecuted criminally as well as civil.

The usage of EasyPE is without any obligation or warranty by the author, software producer or distributor.
